TAKING CARE OF TREES ENVIRONMENTAL POLICY

Taking Care of Trees (TCT) is committed to the continual development and implementation of effective sustainability solutions in our business processes and practices to benefit our impact on the environments of which we work.

The management team at TCT recognizes their responsibility to the environment and commits to perusing methods of minimising impact on the environment, building them into our daily practices and complying with all applicable environmental laws and regulations, both federal and state. Where no specific regulations exist, TCT will adopt appropriate responsible standards.

TCT believes that all employees and everyone associated with TCT have an important role to play in achieving their environmental goals and encourages concern and respect for the environment.

Taking Care of Trees is committed to:

- Establishing SMART (specific, measurable, attainable, realistic and timely) objectives and targets
- Conserving natural resources by reusing and recycling
- Operating in an ecologically sustainable manner
- Having an environmentally responsible culture & being an environmentally responsible neighbour in our community
- The responsible use of energy throughout our organisation including utilizing renewable energy sources where possible
- Encouraging and equipping our employees to identify and act upon opportunities to minimise any adverse environmental impact
- Ensuring our employees are aware of their accountability to control, minimise the impacts of, and report any event or condition with the potential to harm the environment or breach a condition of environmental legislation
- Cooperating with appropriate authorities and ensuring all licences, approvals and permits are current
- Acting responsibly to correct incidents or conditions that endanger health, safety or the environment & promptly report any incidents to relevant authorities as appropriate
- Utilising our knowledge and experience to work with and encourage clients to consider sustainable techniques, methods and solutions.

Some of the ways that TCT achieves their goals includes (but is not limited to):

- Reducing environmental emissions output by driving sensibly, limiting brake usage, avoiding areas of congestion where possible and turning off vehicle engines when the vehicle is not in use.
- Utilizing electronic document management where possible
- Where possible, printing on recycled paper and recycling paper for printing of internal documents
- Turning off computers & lights when they are not in use
- Where possible opting for fresh air instead of using the air conditioner
- Disposing of waste thoughtfully and in line with legislations

TCT has developed and implemented an environmental management system which is regularly reviewed to ensure it remains relevant to its operations and compliant with changes in legislation and the general requirements of AS/NZS ISO 14001:2016 Environmental Management Systems

Management fully endorses this Environmental Policy and the Business Management System that has been implemented.
